Foreword - The Gums

On behalf of the Stevenson family we would like to welcome you to The Gums Fine Wool Ram Sale, 2023.

In a significant change to how we do things, this season we have split the ram sale – with the Terminal sale held back in December, and the Fine Wool ram sale now. We have also altered how we conduct this sale and have made the move to a Helmsman Sale. We have made these changes to provide a better ram buying experience for our clients. We hope that you find these changes useful.

The Helmsman selling process will be explained in detail on the day. We will ensure everyone participating is clear on how it works and have the opportunity to purchase the rams they want. So don't be concerned if this is your first Helmsman experience.

I'm pleased with the rams we are able to put in front of you this year. The figures backing them up, along with their phenotype, position them to take us and our clients flocks forwards. While sheep breeding has increasingly become more complex and specialised, the fundamentals remain the same. We are after a sheep that operates as the engine room of a profitable, resilient and enjoyable farm business. The must have do-ability, produce, survive and remain healthy with minimal inputs and labour.

The Quarterbred rams offer a durable fine wool genetic package that plays a role as both a breed type in itself and as a tool for producers looking to align their flock with market specifications. We see them as the optimum tool for Crossbred producers to transition their flocks to a finer genetic base with minimum impact on “do-ability”. They are also a useful tool for mid micron flocks targeting Smartwool type contracts or for commercial Merino flocks aiming to add robustness to their flocks without compromising wool quality and quantity.

The Halfbred rams have been through a rigorous selection process to make it to sale day. Our objective in the Halfbreds is to provide genetics to our clients that enable them to hit premium contract markets with their wool clip, maintain an efficient fertile ewe flock that produces a good lambing percentage with lambs that grow out well and provide good quality meaty carcasses.

Across the board the Halfbreds and Quarterbreds have leading health traits. This is the first year that we have individually faecal egg counted the ram hoggets and have been pleased to see the results come through.

The Poll Merino rams on offer are the top end of our Poll Merino rams. They offer a good carcass and constitution, along with wool quality and quantity that a modern merino must maintain. They sit squarely in Icebreaker contract territory.

\We look forward to seeing you at our sale. Please contact us any time if you have any queries.

Regards,

Mark & Joanne Stevenson

Conditions of sale

1. This sale will be conducted under the New Zealand Stock & Station Agents Association Conditions of Sale. When proceeds are credited or a purchase is debited to a Hazlett account the companies terms and conditions apply to the extent deemed relevant. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of Hazletts terms and conditions are also available on their websites.
www.hazlett.nz/content/uploads/2021/07/Terms-of-Trade-Hazlett.pdf
2. Each lot shall become the property of the purchaser at the fall of the hammer.
3. Finance terms are strictly cash prior to delivery unless credit arrangements have been made with the Auctioneer prior to the sale.
4. The entry of rams in this catalogue constitutes a guarantee of fertility. Any disputes shall be settled by an Arbitrator appointed by the Auctioneer.
5. Although all care has been taken to ensure the accuracy of the information contained in this catalogue, no responsibility is accepted for any error or omission.
6. The Sale will be conducted exclusive of GST.
7. A 6% rebate commission will be paid to outside companies introducing buyers to the selling company at least 24 hours prior to the sale.
8. **Transport:** Leave full and explicit instructions in regard to transport
9. **Insurance:** The Selling Agents can arrange insurance on any stock.
10. Upset Price: Reserves will be listed on the Helmsman Auction Whiteboard
11. If a transfer is required the transfer price will be \$2,000.

Overseas Export

12. Prior to auction - Purchasers who wish to export the animal/s (“Export Purchasers”) must advise the auctioneers at least 2 hours prior to the sale commencing that they are considering purchasing specific breeds at the auction. The Auctioneers will then advise all vendors of relevant breeds that their animals are being considered for export. Vendors not wishing to have their animals considered for export are to advise the Auctioneers.
13. Purchase at auction by Export Purchasers is conditional upon the animal/s purchased passing all relevant export protocol and testing (conducted at the Export Purchaser’s expense). Full payment (plus GST) will be made at the fall of the hammer to the Auctioneers as per usual terms and conditions. Payment will be held by the Auctioneers until the animal/s leave New Zealand. Payment will be refunded to the Export Purchasers less all associated export costs for any animal/s purchased failing export protocol and testing.

ALL RAMS ARE VET TESTED AND ACCREDITED BRUCELLOSIS FREE

OSH Every effort will be taken by the Vendors, Hazlett, their staff and assistants, both on the sale day as well as any visits of inspection to ensure the safety of intending buyers and visitors. We wish however to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety.

Animal Health

1. All rams are vet tested and accredited brucellosis free
2. The Gums Rams are on a 10 in 1 Vaccination programme and received a booster Covexin vaccination in September 2022.

Estimated Breeding Values

Australian Sheep Breeding Values (ASBV's) Are presented for Quarterbreds, Stabilised Halfbreds and Poll Merinos. Information to assist with the interpretation of these are provided on page 8. Please don't hesitate to ask Mark for assistance in understanding these or email: mark.stevie@gmail.com

Helmsman auction Explanation

How it works:

1. Buyers register on arrival and receive a buyer's number.
2. Rams will be available for inspection from 11am. Buyers can look at them at any stage during the sale without time pressure.
3. When the sale commences at 2pm all rams will be on the market simultaneously. Buyers can bid on any ram by writing their bid on a card and handing it to the front desk.
4. Bids are recorded on a whiteboard, with the leading bid and buyer number recorded on each lot. Buyers can see when they lead the bidding or are outbid on any lot and can bid on any number of rams they wish.
5. If a ram exceeds a buyer's budget they can bid on their next choice ram and can reinspect rams at anytime.
6. The auction will run for somewhere between 30 minutes and an hour. After this time, bids must be placed within 2 minutes. Each time a bid is placed near the end of the auction, the timer will start for another 2 minutes. The time periods used are at the discretion of the sale commentator.

Footrot Resistance

Resistance to footrot is a trait we have been working on here for a number of years – across all breeds. To achieve this we have used a number of tools, including culling susceptible animals, the Lincoln University Footrot Score, and more recently the Footrot Breeding Value. This year we are presenting footrot resistance breeding values for those animals that reach a threshold accuracy level.

Within the industry footrot breeding values now range from -0.95 to 1.11, with lower breeding values associated with an animal less susceptible to footrot under central progeny test challenge conditions.

The Gums has regularly entered rams in the Central Progeny Test (CPT) in order to allow us to benchmark our performance and to provide genetic linkage to the rest of the industry. Halfbred sire 378-15, has performed exceptionally well in the CPT for health traits of footrot resistance and worm resistance. This has provided us with a strong basis on which to continue build.

The FR ASBV is a tool to select sheep based on their genetic susceptibility to footrot. By breeding from less susceptible sheep, you can improve the level of tolerance to footrot in your flock over time. Sires with a lower FR ASBV will produce progeny that get infected less, have fewer affected feet and less severe footrot (fewer score 3 and 4 lesions). This will make footrot outbreaks easier to manage and reduce impact of disease on production traits i.e. fleece weight, fleece quality, lambing performance, lamb survival, bodyweight and growth rates.

There is variation in genetic susceptibility to footrot. In the below graph you can see that under a specific severe footrot challenge, a flock with an average FR ASBV of -0.5 will have a significantly lower proportion of underrun feet (foot scores 3, 4 and 5) compared to a flock with an average FR ASBV of +0.5. The bell curve on the graph represents the current FR ASBV database population.

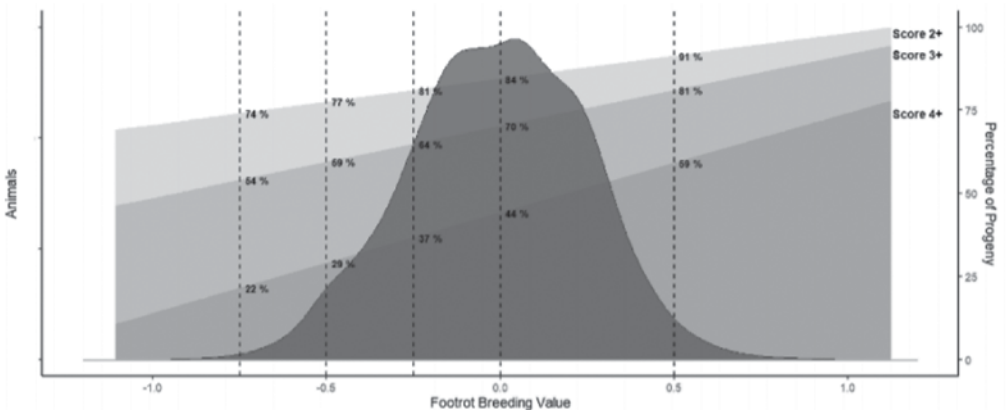

FIGURE 1: A flock undergoing a footrot challenge.

The bell curve shows the flock's distribution of FR ASBV's. The axes show the relationship between the FR ASBV and the flock's subjective foot scores as a percentage. The more negative (left) the flock's average FR ASBV is, the less susceptible the flock is to footrot.

Understanding MERINOSELECT ASBV's

At The Gums we are utilising MERINOSELECT ASBV's as a tool to assist us and our clients in breeding profitable sheep. Breeding Values are a tool to assist in selection. In our view, they should be used alongside visual assessment of an animal and its suitability for your needs.

The catalogue presents ASBV's for Quarterbreds, Stabilised Halfbreds and Polled Merinos.

The following Information is provided to assist you in understanding the information presented alongside each of the lots.

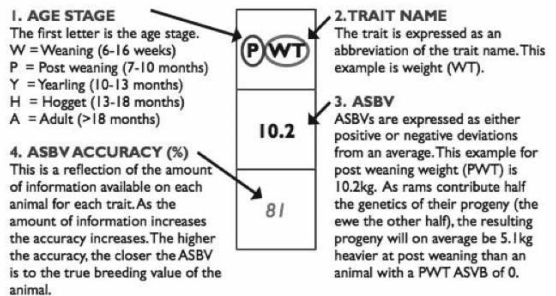

What are ASBVs

ASBVs are the units of measurement MERINOSELECT use to analyse animals.

Australian Sheep Breeding Values are an estimate of an animal's breeding value based on pedigree and performance recorded information.

They are essentially a projection of how that animal's progeny will perform for a range of traits.

The diagram illustrates how to interpret an ASBV.

| Abbreviations Definition | |
|--|---|
| PWT (kg) Post Weaning Weight | Rams with a more positive Post Weaning Weight will, on average, produce lambs that grow faster and are heavier at 7 - 10 months. |
| YWT (kg) Yearling Weight | Rams with a more positive Yearling Weight will, on average, produce lambs that grow faster and are heavier at 10 - 13 months. |
| YFAT (mm) Yearling Fat | Rams with a more positive Yearling Fat ASBV will, on average, produce progeny with a higher fat depth at a constant weight. |
| YEMD (mm) Yearling Eye Muscle Depth | Rams with a more positive Yearling Eye Muscle Depth ASBV will, on average, produce progeny with more muscling at a constant weight. |
| YCFW (%) Yearling Clean Fleece Weight | Rams with a more positive Yearling Clean Fleece Weight will, on average, produce progeny that cut more wool. |
| YSL (mm) Yearling Staple Length | Rams with a more positive Yearling Staple Length will, on average, have greater genetic potential for longer fibre length. |
